### **DETAILED ACTION**

1. An Applicant's Amendment filed on February 28, 2006 has been entered. Claims 12-26 have been canceled; and claims 27-33 have been added. Overall, claims 1, 2, 5-11, and 27-33 are pending in this application.

2. Based on a previous applicant's election without traverse of the invention of Group I and the species of Figures 2-3, claims 2 and 29 are readable thereon and will be examined in their full merit.

Newly submitted claims 27, 28, and 30-33 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: each of these claims reads on the species of Figure 4, in which an ignition timing is not at all retarded until a negative pressure of the intake pipe or of the brake booster is equal to or less than a predetermined value.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 1, 5-11, 27, 28, and 30-33 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### ***Drawings***

3. The formal drawing of Figure 1 filed on February 28, 2006 has been approved for entry.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 2 and 29 are rejected under 35 U.S.C. 102(e) as being anticipated by Tsunooka (U.S. Patent 6,557,524).

As shown in Figures 1 and 4, Tsunooka discloses a control apparatus and a control method for an internal combustion engine (10), the apparatus comprising:

- a brake booster (18) for increasing a brake force of a brake by using a negative pressure of an intake pipe (34) employed in the internal combustion engine; and

- an ignition retarding control means (12, 54) for executing ignition retarding control to retard an ignition timing at a cold start in order to promote an operation to heat a catalyst for cleaning an exhaust gas (see lines 31-39 of column 9),

wherein the ignition retarding control means starts the ignition retarding control after a predetermined time ( $t_{10}$ ) lapses since a start (see Figure 4A and lines 14-22 of column 10).

***Response to Arguments***

6. Applicant's arguments with respect to the references applied in the previous Office Action have been fully considered but they are not persuasive.

In response to applicant's argument that Tsunooka fails to disclose or suggest a step of starting an ignition retarding control after a predetermined time lapses since an engine start (page 9 of Applicant's Amendment), the examiner respectfully disagrees.

The text on lines 14-16 of column 10 in Tsunooka reads as follows: "*As shown in FIG. 4A, at a point of time  $t=t_{10}$  after the engine 10 is started, the ignition timing starts being retarded so as to accelerate warm-up of a catalyst, for example.*" (emphasis added by examiner). Therefore, Tsunooka clearly discloses the claimed feature in dispute.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
